

Jive Software

Software Support Engineer Interview Test

Ken W. Alger

kenalger@comcast.net

Configuration of MySQL Server

1. Run the contents of the script.sql query, either from the attached file or from the Script below, in MySQL administration.
2. This will create a database called jive_ssei_test and a table called entries.
3. The MySQL database has the default username of "**root**" and password or "**root**".

Installation of WAR file

1. Stop Tomcat.
 2. Copy Jive_SSEI_Test_war.war to the **TOMCAT_HOME/webapps** folder.
 3. Start Tomcat.
-

MySQL Script

```
CREATE DATABASE IF NOT EXISTS jive_ssei_test
  DEFAULT CHARACTER SET utf8
  DEFAULT COLLATE utf8_general_ci;

CREATE TABLE IF NOT EXISTS jive_ssei_test.entries (
  id          INT PRIMARY KEY AUTO_INCREMENT,
  os          VARCHAR(30),
  osVersion   VARCHAR(30),
  notes       VARCHAR(150),
  created     TIMESTAMP DEFAULT NOW()
);
```
